

HiLook THC-T229-MS

· Specification summary

Manual product family	Listed in the 2 MP ColorVu Audio Fixed Turret & Bullet Camera family; the applicability table assigns this exact model to Type III. Confirm the supplied unit.
Sensor reference	A CMOS sensor is listed in the family features; sensor size and exact pixel dimensions are not established by this manual.
Microphone reference	A microphone is shown in the Type III overview. Confirm audio transport, recorder support and settings; no speaker or two-way audio is established here.
Video output reference	TVI, AHD, CVI and CVBS are listed as selectable outputs. Confirm recorder compatibility; four formats do not mean four simultaneous video outputs.
Output switching	The Type III note specifies holding the switch button for 5 seconds to change video output. Check the intended recorder format before configuring.
Manual power reference	The family safety instructions specify a 12 V DC SELV/limited-power-source supply and refer to technical specifications for details. Confirm the exact input label and adapter; current, consumption and adapter inclusion are not established here.
Mechanical angle adjustment	Type III installation shows manual pan 0° to 360°, tilt 0° to 75° and rotation 0° to 360°. These are mounting adjustments, not motorised PTZ or remote movement.
Junction box or inclined mount	The Type III instructions require a junction box or inclined ceiling mount to be purchased separately when that mounting method is used. Confirm the exact accessory fit; no unlisted accessory SKU is inferred.
Wall mount	A wall mount is to be purchased separately for Type III wall mounting. Confirm accessory compatibility and installation requirements with the appointed installer.
Outdoor cable protection	For outdoor installation, the manual requires waterproofing connected and spare cables; waterproof tape is purchased separately. This instruction does not establish a housing IP rating.
Menu connection reference	The family manual illustrates a camera, compatible TVI DVR and monitor for menu access. Its PTZ Control menu entry is not evidence of a motorised camera.
Video-format menu reference	The family menu lists 2 MP at 25 fps, 2 MP at 30 fps, PAL or NTSC. Confirm the actual model menu and selected output; this is not a promise that every output format carries 2 MP video.
Exposure-menu reference	GLOBAL, BLC, HLC and DWDR are listed in the family exposure menu. Confirm the actual menu; DWDR is not a 120 dB true-WDR rating.
Audio-menu reference	The family audio menu describes ON/OFF and a LEVEL setting. Confirm the actual camera, recorder and supported audio path; this does not establish a loudspeaker or duplex talk.

Specifications are summarised from the manufacturer's published information (checked 2026-10-18). They describe the cited version only. Confirm the exact model, suffix and supplied revision before ordering. ISD confirms supply, price, availability and warranty separately.
